

iTRANS 2

- · Large Sensor Offering Electrochemical, Catalytic and Infrared
- · Non-Intrusive Calibration
- · Smart Sensor
- · HART (optional)
- · RS-485 Modbus
- · Programmable Relays (optional)
- Dual Gas Sensing (optional)

Applications

- Oil and Gas Industry
- Offshore Drilling
- Utilities and Power
- Petrochemical Industry
- Municipal Water and
- Waste Treatment
- Food and Beverage Production

Sensors

The iTrans 2 is available with sensors for most common gases including: Infrared Combustible, Catalytic Bead Combustible and electrochemical sensors. It can support simultaneous detection from two sensors, either directly attached to the display, or remote sensors. Please note that the IR Combustible Sensor is not approved for use by CSA.

Versatile

The iTrans 2 can be configured to meet nearly any application through its state-of-the art features and options.

- Explosion-proof
- HART (optional)
- RS-485 Modbus
- Stainless Steel Enclosure (optional)
- Programmable Relays (optional)
- 3-wire, 4-wire Installations
- Dual Gas Sensing (optional)
- Remote Sensing (optional)
- Large Sensor Offering Electrochemical, Catalytic and Infrared

Easy to use

- **Smart Sensor**
- Non-Intrusive Calibration
- Dual-channel split-screen LED display

Certifications

Other features and benefits

Dual Gas Sensing

The iTrans 2 can detect and display up to two gases on certain models. Both gas sensors may be mounted directly to the transmitter, or may be mounted remotely.

Wide Sensor Offering

The iTrans 2 supports Electrochemical, Catalytic Bead and Infrared sensors. The iTrans 2 is available for most common industrial gases, allowing of standardization for your gas detection equipment.

Smart Sensors

The iTrans 2's smart sensors come factory pre-calibrated and automatically send sensor information, such as sensor life, to the transmitter. A sensor life indicator is displayed immediately after each calibration.

Dual-channel split-screen LED display

For optimum visibility in dark places

Non-Intrusive Calibration

The iTrans 2's non-intrusive interface keys operate with a simple magnetic wand and allow for full transmitter configuration and calibration without opening the unit's explosion-proof housing.

Programmable Relays

The microprocessor-controlled transmitters are capable of independent operation or multi-point system configuration. With optional on-board relays, the monitor has the added ability of stand-alone operation, activating alarms, horns or fans, and can also shut down a system without the need to wire back to a central control panel.

Multiple Wiring Options

The iTrans 2 can be configured to meet almost any installation application. Common configurations includes: 3-Wire (4-20mA) Models - Allow for full utilization of the iTrans 2's features and options and can be used with all of the iTrans 2's sensors.

4-Wire (Digital ModBus) Models - Allows for full utilization of the iTrans 2's features and options and can be used with all of the iTrans 2's sensors.

HART™

Communication Protocol

With the optional HART Communication Protocol, the iTrans 2 offers remote diagnostics, set-up or calibration by super imposing a high-frequency current across the industry standard 4-20mA analog

Stainless Steel Enclosure

An optional stainless steel enclosure for corrosive environments.

Ordering information

iTrans 2 offers a wide variety of sensor configurations and relay options for maximum flexibility and affordability. Use the following guide to select the options that best fit your monitoring needs and applications. Oldham recommends that a fixed system application survey be completed to help provide the most accurate assessment of your equipment requirements

iTrans 2 Base Part Number: iTrans 2-ABCDEFG (sensor options listed below) Magnetic calibration tool, and calibration cup are standard items with all iTrans 2 monitors.
