Sotera Systems™ pumps, meters, and accessories are produced in The United States of America by Tuthill Corporation. Our internationally recognized brands also include Fill-Rite® pumps and meters. Our primary customers are in the fields of industrial manufacturing, agriculture, construction, and transportation.

With over 50 years of experience making quality fluid transfer products for the fast and safe transfer of petrochemicals and industrial chemicals, we’re always looking for innovative ways to provide more value to our customers. We understand the importance of quality and value. When we decided to move into air-operated diaphragm pumps, we coupled our experience with the wants of diaphragm pump users to create a world-class product.

Our engineers specify only the most durable materials to produce transfer systems that are dependable and long-lasting. When you combine the highest-quality products with top-notch customer care, you get outstanding value.

Tuthill Corporation is a privately held global manufacturer of industrial goods specializing in rotating equipment such as pumps and meters. From heavy oils to motor fuels, from industrial chemicals to agricultural pesticides, we move it and measure it with a reliability that’s measured in decades. But that’s just half the story. Our people make the real difference. Our Conscious Company culture attracts and supports the kind of people who understand what our customers want and what they need. Our people listen well and gain trust by following through on each and every commitment they make. We thrive on having customers who demand excellence because it’s through their challenges and encouragement that we’ll one day be counted among the top 1 percent of the world’s industrial companies. We pursue excellence because we’ll accept nothing less in our products and from our people.

Excellence at Work. Excellence in Life.
INDUSTRY CHANNELS

Municipalities
From the simplest tote or drum pump and metering applications, to the more sophisticated OEM applications, Sotera Systems efficiently and accurately cover a range of difficult requirements.

Chemical
Corrosive, abrasive, and viscous applications are no challenge. Our range of materials of construction, combined with our performance, provides the best available solution.

Transportation (Garage Solutions)
Ideal for servicing vehicle fleets, petroleum, or chemical fluids.

OEM
The perfect OEM pump for any industry where aggressive chemicals or petrochemicals need to be transferred and metered.

INDUSTRY NEEDS

Minimize Downtime
Sotera products minimize downtime because of their rugged construction and reliability in even the most adverse conditions.

Ease of Use
With their modular construction, fewer parts and unique design, Sotera makes maintenance fast and user-friendly.

Efficiency
Sotera offers the most efficient air-operated double diaphragm pumps on the market.

Performance
Sotera air-operated double diaphragm pumps provide the highest flow in the industry, along with the lowest pulsation and leak-free operation.

KEY APPLICATIONS USE

Oil and lubes
Concrete additives
Industrial chemicals
Adhesives
ATF, windshield-washer fluid
Inks and paints
Caustics and acids
Agricultural chemicals

5-YEAR WARRANTY
Tuthill warrants that the SP100 Series Air-operated Double Diaphragm Pump will be free of manufacturers defects and will perform seamlessly under normal operating conditions for a period of five years.
SP100 FEATURES - 1/2" NON-METALLIC

What started as a seed of an idea to create a revolutionary new process pump has evolved into the most advanced air-operated diaphragm pump on the market. Introducing the SP100 Series Air-Operated Double Diaphragm Pump. It’s grown into something big!

In a grueling industrial process environment, your diaphragm pump needs to perform day after day, providing years of long-lasting performance. The SP100 Series Air-Operated Double Diaphragm Pump can be configured in materials that are resistant to industrial chemicals and proven to provide complete compatibility coverage for a wide range of fluids. With its extensive list of features, the SP100 Series outperforms the competition time and time again.
AIR MOTOR CONSTRUCTION
Glass filled polypropylene or groundable Nylon for use with fluids with low flash point.

CERAMIC AIR VALVE
Patented air valve assembly.

POLYPROPYLENE OR PVDF HOUSING
For harsh chemicals

ELASTOMER OPTIONS
Hytrel™, Santoprene® or PTFE elastomers cover many fluid applications.

MANIFOLD CONNECTIONS
Bolted manifolds for quick and easy maintenance.

EASY-OFF PATENTED RING CONSTRUCTION
Patented ring construction. No bolts needed. Made from phenolic material for strength.

BALL CHECK AND SEATS
Ball cage built into manifold holds shape for consistent suction lift.
SP100 FEATURES - 1" METALLIC

AIR MOTOR CONSTRUCTION
Glass filled polypropylene or groundable Nylon for use with fluids with low flash point.

MANIFOLD CONNECTIONS
Bolted manifolds for quick and easy maintenance.
KITS AND ACCESSORIES
Complete your pump package with our extensive line of accessories. Whether you’re pumping from a tote or from a tank, we have everything to complete your installation.

**Tote Plate**
The stainless steel plate secures to the top of a 275 or 330 gallon tote.
- Mounting hardware included.
- Fits all SP100-05 models.

**Wall Mount Bracket**
Keep your pump in place and out of the way with a compact wall mount bracket.

**Filter/Regulator Assembly**
Provides controlled, consistent air pressure as required. The filter removes airborne solid and liquid contaminants.
- Piggyback filter/regulator
- Quick-connect coupler
- Unions
- 5’ air hose

**825 / 850 Meters**
Complete the package with our nutating disc digital meters. Glass-filled polypropylene housing and either EPDM or fluorocarbon seals, offering 2-20 gpm and 0.2% accuracy, these meters quickly and accurately measure pump output.

**Muffler**
Replacement muffler to keep noise to a minimum.
- Included with pump.

**Assembly Wrench**
Replacement wrench for assembling or disassembling the pump.
- Wrench included with pump.

**SANTOPRENE®:** This diaphragm is an excellent choice as a low-cost alternative to PTFE in many acidic and caustic applications such as sodium hydroxide and sulfuric or hydrochloric acids. Santoprene offers excellent abrasion resistance and durability at a cost comparable to neoprene.

**HYTREL™:** This diaphragm exhibits excellent abrasion resistance, flex life, and durability. Excellent for applications involving petroleum/oil-based fluids such as fuel oils, hydraulic oils, kerosene, turpentines, and motor oils.

**PTFE:** This diaphragm is an excellent choice when pumping highly aggressive fluids such as aromatic or chlorinated hydrocarbons, acids, caustics, ketones, and acetates. Sotera’s PTFE diaphragms are backed with Santoprene to enhance flex life.
